[Portfolio](#)

Summary

Product Designer with an engineering background and over two years of experience across Real Estate, Medical CRMs, e-commerce, SaaS, and FinTech. I create products that balance clarity, usability, and business impact, simplifying complex systems and building user trust. My approach combines user-focused creativity with systematic thinking to create intuitive and reliable experiences. In FinTech, I'm learning more about how business strategy shapes products and how thoughtful design can make everyday financial tasks feel simpler and more empowering.

Experience

Product Designer - PayTabs

(August 2023 - Present)

- Boosted task completion by 24% and conversion rate by 18% through UX audits of the PayTabs Merchant App using heuristic evaluation and competitor benchmarking.
- Designed and implemented the Card Issuance Dashboard from scratch for managing virtual card issuance, streamlining workflows, optimizing information architecture, and establishing UI patterns.
- Collaborated with the SwitchOn team (PMs and Devs) on the ZMK Import project, analyzing security workflows and delivering the CSS handover to developers.
- Collaborated with QA and development teams to enhance typography and spacing consistency across products, while designing the PayReels, Logistics, and Events modules from the ground up.

UX/UI Designer - Freelancer

(January 2022 - Present)

- Led the design and delivered 7+ digital products across FinTech, Real Estate, E-Commerce (B2B2C), Medical CRMs, and Interior Solutions industries.
- Delivered end-to-end MVPs and UX audits for clients across the MENA region, including Rentit (C2C Rental Marketplace) and Alexandria International (B2B Office Furniture & Flooring).
- Improved usability, conversion, and engagement through UX research, responsive UI design, and heuristic evaluations.
- Collaborated with developers on technical feasibility and seamless handover, and with product owners to align design with business goals and market standards across the MENA region.

UX design Internship - Tremoloo

(February 2023 - April 2023)

- Aligned business goals with user needs through stakeholder interviews, identifying trust and convenience as key priorities.
- Performed competitive analysis to map market positioning and highlight opportunities in the pet-care industry.
- Synthesized findings into personas, empathy maps, and actionable insights that guided user-centered design decisions.
- Facilitated How Might We sessions to translate research insights into creative, feasible design concepts.
- Conducted usability testing to validate design decisions, ensuring clarity and accessibility throughout the app flow.

Education

Bachelor of Engineering (BE) **(Sept 2020 - June 2025)**

Higher Institute of Engineering and Technology
Finished 5 years of bachelor's degree in communication engineering and electronics.

Skills

- | | |
|---|---|
| ● Qualitative User Research (Interviews, Focus groups, Usability Testing) | ● User Flows |
| ● UX Auditing | ● Design Systems and Component Libraries |
| ● Heuristic Evaluation | ● Wireframing and Prototyping |
| ● User Journey Mapping | ● Competitive Analysis and Market Research |
| ● Personas | ● Data-Driven Decision Making |
| ● Information Architecture | ● Requirements Analysis & Scoping |
| | ● Cross-Functional Collaboration (PMs, Devs, Marketing) |
